

# Isotopes in Environmental and Health Studies

| Contents Volume 44 Issue 1:   | Page(s)   |
|---|-----------|
| Another special issue: 40 years Craig-Gordon model of isotope fractionation of water<br>Authors: Gerhard Strauch; Roberto Gonfiantini   | 1         |
| Preface<br>Author: Roberto Gonfiantini  | 3 - 4     |
| The isotopic composition of evaporating waters - review of the historical evolution leading up to the Craig-Gordon model<br>Author: Joel R. Gat   | 5 - 9     |
| Revisiting the boundary layer structure used in Craig and Gordon's model of isotope fractionation in evaporation<br>Authors: Josef Tanny; Jacob Cohen   | 11 - 21   |
| Isotope effects in the evaporation of water: a status report of the Craig-Gordon model<br>Authors: Juske Horita; Kazimierz Rozanski; Shabtai Cohen  | 23 - 49   |
| Isotope effects accompanying evaporation of water from leaky containers<br>Authors: Kazimierz Rozanski; Lukasz Chmura   | 51 - 59   |
| Deuterium excess in precipitation of Alpine regions - moisture recycling<br>Authors: Klaus Froehlich; Martin Kralik; Wolfgang Papesch; Dieter Rank; Helfried Scheifinger; Willibald Stichler                                  | 61 - 70   |
| Mbaka lakes isotopic ( $^{18}\text{O}$ and $^2\text{H}$ ) and water balances: discussion on the used atmospheric moisture compositions<br>Authors: Manuëlla Delalande; Laurent Bergonzini; Marc Massault                      | 71 - 82   |
| Evaporative isotope enrichment as a constraint on reach water balance along a dryland river<br>Authors: John J. Gibson; Mostafa A. Sadek; D. J. M. Stone; Catherine E. Hughes; S. Hankin; Dioni I. Cendon; Suzanne E. Hollins | 83 - 98   |
| Estimation of lake water - groundwater interactions in meromictic mining lakes by modelling isotope signatures of lake water<br>Authors: Anne Seebach; Severine Dietz; Dieter Lessmann; Kay Knoeller                          | 99 - 110  |
| $\delta^{18}\text{O}$ characteristics of lichens and their effects on evaporative processes of the subjacent soil<br>Authors: Britta Hartard; C. Máguas; M. Lakatos   | 111 - 128 |
